

RON WELCH, MD

Psychiatry
Santa Rosa

A founding member of the Department of Psychiatry in Santa Rosa when the facility opened in 1980, Dr. Welch has made major contributions to improving care and service for our members in such key roles as Assistant Chief and Chief. He has been a leader throughout the transition to KP HealthConnect, our powerful new electronic health records system, and a physician leader for the department in our Labor-Management Partnership. He shares his clinical expertise in treating Adult Attention Deficit Disorder at numerous presentations to TPMG and the community. His colleagues respect him deeply for his work ethic, reliability, collegiality, teamwork, and efficiency in managing a very large caseload, while consistently receiving high praise from our members for his outstanding care.

2008 TPMG 60TH ANNIVERSARY
