

## William Elliott, MD

ASSISTANT PHYSICIAN-IN-CHIEF, SAN RAFAEL

2013

Cecil Cutting  
Leadership Award

Taking a medication for asthma? Diabetes? Arthritis? Chances are excellent that whatever you take was selected under the leadership of William Elliott, MD.

Since 1986, Dr. Elliott has chaired San Rafael's Pharmacy and Therapeutics Committee where he oversees all medication issues for the medical center.

His work was so impressive on the local level, that in the early 1990s he was asked to lead numerous regional pharmacy projects. In this role, he helped create Northern California's first two clinical guidelines for the treatment of hypertension and cholesterol. As chair of the Regional Formulary committee for the last 24 years, he continues to help review and select medications for virtually every condition, based on their safety and effectiveness.

**“ Guiding our pharmaceutical choices is extremely gratifying,”  
says Dr. Elliott. “I’ve loved doing that for our members.”**
