

TRANSFORMING
HEALTHCARE

ROBERT LONJERS, MD

APIC, Information Technology and Pharmacy
Fresno

I love technology and making it work for people.

One of the most amazing systems we have at Kaiser Permanente is HealthConnect, for electronic medical records. This powerful tool helps our doctors deliver even higher quality care.

I'm proud to support physicians as we make the transition to HealthConnect. It's almost like jumping from the Stone Age to the Space Age.

I helped set up HealthConnect University to teach doctors how to navigate the system, and our curriculum is used throughout the region. I also work one-on-one with physicians (especially the technologically challenged!), and I enjoy seeing so many master the system.

I'm integrating HealthConnect with our pharmacy department to smooth communication between physicians and pharmacists, and improve care and service.

It's exciting to be on the ground floor of a system that's revolutionizing the way we care for our members.

ROBERT LONJERS, MD

INTERNAL MEDICINE, FRESNO

2009 Cecil Cutting, MD LEADERSHIP AWARD

Robert Lonjers, MD, has worn many leadership hats. So far, each has been a perfect fit.

As APIC for IT, he's led the Fresno facility's successful transition to KP HealthConnect. His teaching ideas and tips formed the basis for the HealthConnect University curriculum, adopted by many medical centers to enhance physicians' skills and understanding of the new system.

His one-on-one sessions with physicians (especially the technologically challenged!) help them rapidly go from KPHC novice to master – a skill set that benefits both provider and patient alike.

As APIC for Pharmacy, he once again spent countless hours and displayed enormous skill and patience teaching physicians best practices for KPHC's pharmacy component.
