

Brian Hoberman, MD
KP HealthConnect Inpatient
Regional Office

Dr. Hoberman's vision, perseverance and exceptional leadership talents have made the implementation of KP HealthConnect (KPHC) Inpatient a success.

In 2003, Dr. Hoberman began working closely with software vendor Epic to improve their inpatient, ED and OR products because as he explains, "the initial system was not mature enough for us to implement."

After an intensive development effort, Dr. Hoberman and his team successfully launched the first version of HealthConnect in South Sacramento in 2006. He worked with the same dedication to complete HealthConnect implementation at all KPNC hospitals in 2010.

Dr. Hoberman still works closely with Epic, his team and KP stakeholders to further refine the system to, in his words, "help people make better decisions and provide better care."
